

Porsche 911 Performance Air Intake

Carbon fiber air intake system for Porsche 996 & 997 Models

The 911 has always been the quintessential model for the Porsche enthusiast to own. Replacing the factory components with our insulated carbon airbox and custom air filter, provides the engine increased inlet volume, enhanced flow velocity, and reduced intake temperature; all pivotal to extracting maximum horsepower. The autoclaved carbon fiber construction results in components of unparalleled strength, lightness, and beauty. Installs in under an hour without modification and meets OEM specifications.

FEATURES:

- Increases horsepower and torque
- Improves throttle response and fuel efficiency
- Maintains factory emissions components
- Fits vehicles with manual or Tiptronic transmissions
- Unique thermal barrier composite construction ensures low inlet temperatures.

PERFORMANCE:

- Power increase: 11-15 hp
- Torque increase: 12-16 lb/ft

APPLICATIONS:

- All 1998-2004 996 Non-Turbo Porsche 911 Models
- All 2004-2008 997 Non-Turbo Porsche 911 Models

RETAIL PRICE:

\$1470.00
